**Subject:** Nutrient Work Group Subcommittee

Dear Nutrient Work Group Members and Interested Parties:

Per the Nutrient Work Group meeting of 1/24/2017, DEQ is requesting that those interested in participating in a technical subcommittee to address Highest Attainable Conditions (HAC) and the Limits of Technology should respond to this E-mail. Please respond within a week. The subcommittee will examine and critique the technical basis of work used to derive draft HAC values for the two discharger groups ( $\geq 1$  MGD,  $< 1$ MGD), and address wastewater limits of technology. Participants should expect a fairly fast-paced schedule (weekly or biweekly meetings) which will commence very soon in Helena. The outcome from this subcommittee will have a substantial bearing on the direction of future Nutrient Work Group meetings.

I will compile those interested in participating and provide them to Dr. Suplee, who will then organize the subcommittee meetings.

Thanks-

Timmie
